

Termine des Anorganisch-Chemischen Kolloquiums im Wintersemester 2016/2017

Georg-August-Universität Göttingen - Institut für Anorganische Chemie

<i>Datum</i>	<i>Gast</i>	<i>Institut</i>	<i>Vortragstitel</i>	<i>Gastgeber</i>
25.10.2016	Prof. Dr. Paula L. Diaconescu	UCLA Department of Chemistry & Biochemistry	Redox switchable catalysis	CaSuS
22.11.2016	Prof. Dr. Suzanne Bart	Department of Chemistry, Purdue University	Investigating the Electronic Structures and Reactivity of F-Block Elements Bearing Redox-Active Ligands	Schneider
25.11.2016, 13:30, MN27	diverse	diverse	Festkolloquium anlässlich des 80. Geburtstags von Prof. Dr. Dr. h.c. mult. Herbert W. Roesky: „Frontiers in Sustainable Synthesis“	GDCh
Mo, 05.12.2016	Dr. Massimiliano Delferro	Argonne National Laboratory	Surface Structural-Chemical Characterization of Single-Site Organometallic Hydrogenation Catalysts Supported on “Hard” and “Soft” Materials	Schneider
Mo, 12.12.2016	Dr. Tim Grüne	Paul Scherrer Institut, Schweiz	Structural Chemistry and Structural Biology with Electrons	Sheldrick
13.12.2016	Prof. Dr. Martin Bröring	Institut für Anorg. und Anal. Chemie, TU Braunschweig	Ring-Contracted Porphyrinoids	Siewert
17.01.2017	Prof. Dr. Patrick Holland	Yale Department of Chemistry	tba	Schneider
20.01.2017 14:15, Physik	Prof. Dr. Licheng Sun	Department of Chemistry, KTH Royal Institute of Technology	Artificial Photosynthesis—From Water Splitting Reaction Mechanisms to Functional Devices	CRC 1073 (Meyer)

Sofern nicht anders angegeben, finden die Vorträge um 17:15 in HS MN 28 statt.
