

Seminar Sedimentology & Sedimentary Petrology

WiSe 2021/22, Tuesday, 16:15

Depending on the situation (decision on short notice) in room 16-5 (or MN01) or online as video conference via BBB

23.11. Róbert Arató

FTAIGE – on the way towards automated fission-track dating via artificial intelligence

30.11. Angana Chaudhuri

Palaeogeographic and paleotectonic reconstruction of western India using provenance analysis of Meso-Cenozoic sedimentary rocks

07.12. ... no seminar

14.12 PhD-defense Jan Schönig (**15:00**)

Deep subduction in Earth history: Seeking for traces in the sedimentary record

21.12 Security training (Volker Karius)

Christmas & New Year break

11.01. Sarah Feil

Provenance of Eocene-Oligocene sandstones from the Central Myanmar Basin

18.01. Abhishek Dixit

Provenance and seasonal variability of suspension and bed load sediment of the Brahmaputra River

25.01. Keno Lünsdorf

Automated heavy mineral analysis – state of progress and some applications

01.02. Michael Tatzel

Si isotope thermometry in silicified carbonates

08.02. Carsten Benner

Tracing Paleoproterozoic UHP-metamorphism in Western Greenland: Clues from modern sand heavy mineral assemblages and garnet chemistry

15.02. Nikola Beslic

Characterization of modern sediment delivered by northward draining Alpine Rivers applying bulk sediment and heavy mineral techniques
